SUMMARY

Full-stack software engineer with 7+ years of experience architecting and building production systems in Go, Python, and Node.js, with React and React Native on the front end. Specializes in designing RESTful APIs and microservices from the ground up, deploying on AWS with Docker and Kubernetes, and owning delivery end-to-end from architecture through production. AWS Certified Solutions Architect, Associate.

SKILLS

- **Languages & Frameworks:** Go, Python, JavaScript/TypeScript, Java, Rust; Django, Flask, FastAPI, Gin, Fiber, Express.js, React, Next.js, React Native
- **Cloud & DevOps:** AWS (EC2, RDS, S3, Route 53), Docker, Kubernetes, Jenkins, GitHub Actions, CI/CD, Linux
- **Data & Practices:** PostgreSQL, MongoDB, Redis; Microservices Architecture, RESTful API Design, Git/GitHub

EXPERIENCE

Mviyo Technologies, Software Architect

May 2024 – August 2025 (previously Senior Software Engineer, Nov 2023 – Mar 2024)

- Architected the organization's entire product catalog platform, in-house and external, on AWS while balancing scalability against infrastructure cost.
- Owned the end-to-end software development lifecycle across all engineering teams, setting coding standards, review policy, and CI/CD tooling.
- Built RESTful APIs and a Go-based geo-proximity service powering nearby-provider search on the Safi platform.
- Migrated legacy projects onto AWS and designed scaling frameworks to absorb unplanned traffic spikes.

Healthify Medical Software, Senior Software Engineer

December 2021 – November 2023

- Designed and built a large-scale, distributed microservices claims and contributions system (Django/PostgreSQL) for reputable medical aid organizations.
- Built supporting Node.js and Go microservices, including PDF generation and MongoDB-backed audit logging.
- Built CI/CD pipelines (Jenkins, GitHub Actions) enabling zero-downtime Kubernetes deployments.
- Improved RESTful API response times 5x by introducing a caching layer.

Great Sun Financial, Lead DevOps Engineer (Contract)

March 2024 – November 2024 (SWE full-time Mar–May 2024; DevOps contract part-time alongside Mviyo from May 2024)

- Led backend development for Credex, a fintech peer-to-peer digital wallet, as Senior Software Engineer (Node.js, TypeScript, Neo4j, Django).
- Designed CI/CD pipelines and managed development, testing, and canary infrastructure across DigitalOcean and AWS as Lead DevOps Engineer.

Dryback Technology, Founder & Software Developer (Contract)

February 2019 – Present (part-time, alongside the roles above)

- Run an independent software contracting practice delivering full-stack and mobile projects for clients across finance, real estate, and services.
- Delivered the Vantage Point ERP (~609,000 lines of Go), covering POS, inventory, accounting, payroll, and tax fiscalisation, with a React Native mobile POS app.
- Built platform systems for Zimbabwe's largest forex trading institution, including a client portal, admin console, and a video-based learning platform.
- Delivered Melo, an AI-driven savings app used across ten African countries, integrating Paystack payments and OpenAI-powered planning.

Additional roles and 15+ further projects: tyrone-mguni.vercel.app

EDUCATION

AWS Certified Solutions Architect, Associate

2025

National University of Science and Technology, Bachelor's Degree in Finance

September 2016 – May 2020
